Parametric memory: closed-book answer
names it recalls from memory
(avg 8.0 / concept)
1,608
b
Online: Web search
Step A (first batch): before web search (parametric)
names it already knows
(avg 4.9 / concept)
983
Step B (later batches): after web search
new web-searched names
(avg 3.1 / concept)
616
Step C (final answer): Step A + Step B
parametric + a web-searched margin
(traced names, avg 5.4 / concept)
